## **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims**:

1. (original) A mobile camper support, comprising:

a support framework with a camper support surface and at least three support legs;

a plurality of support wheels each rotatably mounted to the support framework

such that the plurality of support wheels rotate about a wheel axis;

the plurality of support wheels being mounted to the support framework under a

bias force relative to the support framework such that bias force between the

support wheels and the support framework is sufficient to support the support

framework when the support framework is not loaded, and the bias force is

exceeded by a predetermined weight of a camper placed on the camper support

surface of the support framework such that the predetermined weight of the

camper is supported by the at least three support legs on a ground surface.

2. (original) A mobile camper support as recited in claim 1, and further

wherein the plurality of support wheels each rotate about a second axis.

3. (original) A mobile camper support as recited in claim 2, and further

wherein the second axis is approximately vertical.

4. (original) A mobile camper support as recited in claim 2, and further

wherein the plurality of support wheels is two in number.

5. (original) A mobile camper support as recited in claim 1, and further

wherein the plurality of support wheels are mounted to the at least three legs of

the support framework.

Please cancel claim 6.

6. (original) A mobile camper support as recited in claim 1, and further

wherein a storage container is mounted within the camper support framework.

7. (original) A mobile camper support as recited in claim 1, and further

wherein there are four support legs.

Please cancel claim 8.

8. (original) A mobile camper support as recited in claim 1, and further

comprising a camper support platform on the support framework, the camper

support platform being disposed to receive at least part of the camper.

Application Serial No. 10/038,031

S:\wi49\001\M02.doc

Page 3 of 16

9. (original) A mobile camper support as recited in claim 1, and further

comprising a wheel support lock configured to fix the wheel support in one or

more positions such that the weight of the camper is entirely on the plurality of

support wheels.

10. (original) A mobile camper support as recited in claim 1, and further

wherein the bias force is a spring bias force.

11. (original) A mobile camper support as recited in claim 1, and further

wherein the bias force is a pneumatic bias force.

Please cancel claim 12.

12. (original) A mobile camper support as recited in claim 1, and further

wherein the plurality of support wheels are mounted within the plurality of

support legs.

13. (original) A mobile camper support as recited in claim 1, and further

wherein the plurality of support wheels are round rollers which rotate about an

axis.

14. (original) A mobile camper support, comprising:

Application Serial No. 10/038,031

a camper support means with a camper support means and a ground interaction

means;

a plurality of support wheels each rotatably mounted to the camper support

means such that the plurality of support wheels rotate about a wheel axis;

the plurality of support wheels being mounted to the camper support means

under a bias force relative to the camper support means such that bias force

between the plurality of support wheels and the camper support means is

sufficient to support the camper support means when it is not loaded, and the

bias force is exceeded by a predetermined weight of a camper placed on the

camper support surface of the camper support means; and

such that the predetermined weight of the camper forces the ground interaction

means to the ground to support the weight of the camper.

15. (original) A mobile camper support as recited in claim 14, and further

wherein the plurality of support wheels each rotate about a second axis.

16. (original) A mobile camper support as recited in claim 15, and further

wherein the second axis is approximately vertical.

17. (original) A mobile camper support as recited in claim 14, and further

wherein the plurality of support wheels are mounted to the at least three legs of

the camper support means.

Application Serial No. 10/038,031

S:\wi49\001\M02.doc

Page 5 of 16

18. (original) A mobile camper support as recited in claim 14, and further

wherein the bias force is a spring bias force.

19. (original) A mobile camper support as recited in claim 14, and further

wherein the bias force is a pneumatic bias force.

Please cancel claim 20.

20. (original) A mobile camper support as recited in claim 14, and further

wherein the plurality of support wheels are mounted within the plurality of

support legs.

21. (original) A mobile camper support as recited in claim 14, and further

wherein the plurality of support wheels are roller means which rotate about an

axis.

22. (original) A mobile camper support as recited in claim 14, and further

wherein the ground interaction means is at least three support legs.

23. (original) A mobile camper support, comprising:

a support framework with a camper support surface disposed to receive a

camper and with a ground interaction surface;

a plurality of support wheel assemblies each movably mounted to the support

framework, each support wheel assembly including a support wheel which

rotates about a wheel axis;

the plurality of support wheel assemblies being mounted to the support

framework under a bias force away from the support framework such that:

the combined bias force of the plurality of support wheel assemblies is of

sufficient magnitude to support the support framework above the ground

when the support framework is not loaded; and

the combined bias force is exceeded by a predetermined weight of a

camper which may be placed on the camper support surface, which forces

the ground interaction surface to the ground to support the weight of the

camper.

24. (original) A mobile camper support as recited in claim 23 and further

wherein the ground interaction surface of the support framework is on at least

three support legs.

25. (original) A mobile camper support as recited in claim 23, and further

wherein the plurality of support wheels each rotate about a second axis.

26. (original) A mobile camper support as recited in claim 25, and further

wherein the second axis is approximately vertical.

Application Serial No. 10/038,031

27. (original) A mobile camper support as recited in claim 23, and further

wherein the plurality of support wheels is two in number.

28. (original) A mobile camper support as recited in claim 23, and further

comprising a wheel support lock configured to fix the wheel support in one or

more positions such that the weight of the camper is entirely on the plurality of

support wheels.

29. (original) A mobile camper support as recited in claim 23, and further

wherein the bias force is a spring bias force.

30. (original) A mobile camper support as recited in claim 23, and further

wherein the bias force is a pneumatic bias force.

31. (original) A mobile camper support as recited in claim 23, and further

wherein the plurality of support wheels are roller means which rotate about an

axis.

32. (original) A method for supporting a camper with a camper weight,

comprising the following:

providing a mobile camper support comprising:

a support framework with a camper support surface and at least three

support legs;

a plurality of support wheels each rotatably mounted to the support

framework such that the plurality of support wheels rotate about a wheel

axis;

the plurality of support wheels being mounted to the support framework

under a bias force relative to the support framework such that bias force

between the support wheels and the support framework is sufficient to

support the support framework when the support framework is not loaded,

and the bias force is exceeded by a predetermined weight of a camper

placed on the camper support surface of the support framework such that

the predetermined weight of the camper is supported by the at least three

support legs on a ground surface;

rolling the support framework under the camper; and

lowering the camper on to the camper support surface of the support framework,

such that the camper weight exceeds the spring bias to force the at least three

support legs to contact the ground surface and thereby support the camper.

33. (original) A method for supporting a camper with a camper weight as

recited in claim 32, and further comprising the following:

raising the camper vertically off the support framework, thereby allowing

the spring bias to lift the support framework off the ground surface; and

Application Serial No. 10/038,031

Page 9 of 16

rolling the support framework on the plurality of support wheels away

from the camper.

34. (original) A method for supporting a camper with a camper weight,

comprising the following:

providing a mobile camper support comprising:

a support framework;

a plurality of support wheels each rotatably mounted to the support

framework such that the plurality of support wheels rotate about a wheel

axis;

the plurality of support wheels being mounted to the support framework

under a bias force relative to the support framework such that bias force

between the support wheels and the support framework is sufficient to

support the support framework when the support framework is not loaded,

and the bias force is exceeded by a predetermined weight of a camper

placed on the support framework such that the predetermined weight of

the camper is supported by the support framework on a ground surface

rolling the support framework under the camper; and

lowering the camper on to the support framework, such that the camper weight

exceeds the spring bias to force the support framework to contact the ground

surface and thereby support the camper.

S:\wi49\001\M02.doc

35. (original) A method for supporting a camper with a camper weight as

recited in claim 34, and further comprising the following:

raising the camper vertically off the support framework, thereby allowing

the spring bias to lift the support framework off the ground surface; and

rolling the support framework on the plurality of support wheels away

from the camper.

36. (original) A method for supporting a camper, comprising the following:

providing a mobile camper support comprising:

a support framework;

a plurality of support wheels each rotatably mounted to the support

framework such that the plurality of support wheels rotate about a wheel

axis;

rolling the support framework under the camper; and

lowering the camper on to the support framework, such that the camper weight is

supported by the support framework on wheels.

37. (original) A method for supporting a camper with a camper weight as

recited in claim 36, and further comprising a support wheel lock mechanism to

selectively prevent the rotation of the support wheels.
